HUB MANAGER

Everything a mechanic does, plus. From the Workshop App to KART.

STEPS

1. Open **Workshop Manager**, the last Workshop tab.
2. **Kart Allocation**: give karts to mechanics.
3. **Campaigns** > **New campaign**: Integrated or Standalone, karts, parts.
4. **Work targets** per person; **Readiness targets** per planning event.
5. **Parts needed** > **Create draft orders**.
6. **Order List** stages: Draft, Submitted, approval by the hub manager, Ordered, then Goods In.
7. **Submit** drafts. The hub manager approves in **Approval queue**: **Approve** or **Reject**.
8. After ordering with the supplier: **Mark ordered** (Approved lines only).
9. **Goods In** on the Ordered line: quantity, unit cost, invoice ref., **Receive stock**.
10. **Hub catalogue**: hide parts, preferred supplier, **Request a part**.
11. **Hub Manager** > **Pending approvals**: approve sign-ups, join links, **Create user**.
12. Mark a kart used by hand: **Requires service** on its Overview tile; **Undo** if wrong.
13. **Reports**: the Workshop App reports in Excel, PDF or CSV.

STATUSES

- **Ready** can race
- **Requires service** used, needs a service (was Turn Required)
- **In Progress** service started
- **Paused** service paused with a reason
- **Repair Needed (usable)** open repair, kart still available
- **Repair Required** must not be used: stopping ticket or blocking repair
- **Campaign Required** open campaign task, kart usable

WATCH OUT

Until your hub's stock is moved, Parts needed may list parts that are on the shelf: check the shelf before ordering.

HELP

Help with KART: AI Support in KART Comms first (bookmark the KART address ending in /comms); it escalates to Remote Support or FKL Central.
