REMOTE SUPPORT

KART Comms, cover and direct chats. From the Workshop App to KART.

STEPS

1. Open the KART address ending in `/comms`. You see the `Support` view.
2. `My queue`: chats you claimed and hubs you cover.
3. `Unassigned`: chats nobody has taken. Open one, tap `Claim`.
4. Reply and `Send`. Ask for the kart number.
5. Solved: `Close chat`. Need more: `Reopen chat`.
6. `Search` finds chats by staff member, hub or message.
7. Type a name in the search box, then tap them under `Start a direct chat`.
8. Select your Hub > `Remote Support` > `Hub Dashboard`.
9. Per event, choose who covers it in the `Support cover` list. Only Remote support holders are offered.
10. No cover? Chats show `Unassigned` and all remote support is alerted.

WHO COVERS TODAY

Comms routes each hub's support chats to whoever covers that hub today and shows them as On cover.

REMEMBER

New direct chats between two colleagues are private to them. Remote support and admins do not see them. AI Support is automatic, not a person. Hub staff ask it first; it escalates chats to remote support.
